

ADDITIONS TO REQUIREMENTS

Rules for the design of article lists of literature

The rules for the design of cited references (bibliography) for authors are compiled taking into account the "Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals" (ICMJE.).

A correct description of the sources used in the bibliography is a guarantee that the cited publication will be taken into account when evaluating the scientific activities of its authors and organizations where they work.

In the list of references, all works are listed in the order of citation (references to them in the text, not alphabetically. References must be numbered as they appear in the text, regardless of the language in which the work is given. In the text of the article, references are numbered in square brackets [1], number indicates the source in the bibliography Bibliographic descriptions of journals must match PubMed or MEDLINE style Journal titles in abbreviated form must match the List of Title

Word Abbreviations (list of title abbreviations -
<http://www.issn.org/services/online-services/> access-to-the-ltwa /).

Each link in the list of references is written on a new line. All documents referred to in the text should be included in the bibliography. In order to increase the citation of authors in the journal, transliteration of Russian-language sources is carried out using official encodings in the following order: the authors and the name of the journal are transliterated using encodings, and the title of the article is semantic transliteration (translation). All Russian-language sources of literature must be presented in a transliterated version. On the website <http://www.translit.ru> you can use the program for transliterating Russian text into Latin.

The order of compiling the list: 1) the author (s) of the book or article (with a group of authors up to 6 people inclusive, all are mentioned, with large groups of authors - 6 first authors "and others", in foreign - "et al."); 2) if editors act as authors of books, after the surname should be put "ed.", In foreign "ed."; 3) the title of the book and article; 4) output data.

If the cited article has a DOI index, you must indicate it in the list of references.

An example of transliteration and translation of an article for Russian-language links:

Fetal congenital diaphragmatic hernia: ultrasound diagnosis possibilities and prediction of postnatal outcome. Akusherstvo i Ginekologiya/Obstetrics and Gynecology. 2014; 4: 38-45. (in Russian)]

It is also possible to design in the following style:

In the bibliographic description of articles from journals, the data are indicated in the following order: Author AA, Author BB Article title. The name of the journal. Released; Volume (number): Page numbers (from and to). (no spaces)
In English: Author AA, Author BB. Article title. The name of the journal.
Released; Volume (number): Page numbers (from and to). DOI reference (no dot at the end)
